|--|------------------------------------|-------------------|
| • Data Structures and Algorithms (DSA) | Database Management Systems (DBMS) | Operating Systems |
| • Machine Learning | Web Development | Computer Networks |
| • Object-Oriented Programming (OOP) | | |

Experience

IntelliHost (Real Estate Company) — Sponsored Project

December 2025 – January 2026

Web Development Intern

Pune, Akurdi

- Designed a responsive front-end using HTML, CSS, and JavaScript for seamless navigation.
- Implemented search, filters, property listings, and detailed pages with images and amenities.
- Built backend logic for user profiles, property listings, and booking records.

Software Developer Intern — Pimpri Chinchwad College of Engineering

June 4 – August 15

Project: Easy Car Parking Management System

- Worked on developing a smart parking automation system integrating machine learning and computer vision.
- Designed and implemented core modules for vehicle detection and parking slot allocation using Python and CV.
- Built RESTful backend services using Flask and Node.js.

Projects

Travel Management System | Angular, Node.js, MongoDB, REST API

- Built a travel booking system with user authentication, package listing, and itinerary management.
- Designed REST APIs with Node.js and integrated Angular frontend for dynamic fast loading UI.

Online E-commerce Website | React.js, Express.js, MongoDB, Stripe API

- Created a full-stack e-commerce platform with product catalog, cart system, and order tracking.
- Integrated secure online payments using Stripe API and optimized backend with Express.js.

Food Delivery System | Vue.js, Node.js, MySQL, Socket.io

- Developed a real-time food ordering system with live order updates using Socket.io.
- Implemented restaurant menus, delivery management, and user order tracking with MySQL backend.
